

Chapter 3: Light and shadow

1. Shadows can move

	<p>Rule 1:</p> <p>The shadow always appears behind the spot you shine onto.</p>
--	----------------------------------------------------------------------------------------

2. The shadow of bodies

	<p>Rule 2:</p> <p>There are no clear bodies to be made out anymore, only outlines.</p>
--	-----------------------------------------------------------------------------------------------

3. Shadows change

	<p>Rule 3:</p> <p>The shadow gets bigger and blurrier when the light source is close to the object. The shadow gets smaller and more distinct when the light source is farther away.</p>
--	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Cut out the pictures and glue them to the correct rule box!
